

PUBLISHING SUMMARY

D2.3 started in month 6 and is ongoing until its completion in month 17. So far the project partners which have worked on D2.3 have been promoting an horizontal cooperation and a mix of top-down and bottom-up initiatives that aim to enable a creation of an EU Central Community of stakeholders (CS), industry-driven, that can contribute to create communities of practice in Member states focused on enhancing and accelerating the take up of digitization by the construction sector. The DigiPLACE partners involved in working on D2.3 have concentrated their efforts on creating digital Construction industry and built environment Community of stakeholders, that includes beneficiaries and non beneficiaries, associations, companies professionals and public entities that operate in the construction chain (builders, technologies, plant building and machineries, construction materials, engineers, architects) but also innovative and ICT services, digital technology suppliers and R&D networks, owners and clients as well as trade unions, universities, research and Competence centres that are interested in participating to the design of the reference architecture for a user centred open digital platform for the construction sector. The partners have been working keeping in mind a clear focus on long-term community building and engagement.
